 <https://phucfedev.vercel.app>

## SUMMARY STATEMENT

- A Frontend Developer with practical experience in **ReactJS**, **Redux Toolkit**, and **Zustand**.
- Specialized in building scalable web applications with clean architecture and optimized performance, achieving **Lighthouse performance scores up to 98/100**.
- Eager to contribute to a dynamic product team to create exceptional user experiences.

## SKILLS

- **Programming language:** JavaScript, TypeScript.
- **Web:** ReactJS, Redux, Redux Toolkit, Zustand, HTML5, CSS3, SCSS, TailwindCSS, Ant Design, MUI, GSAP.
- **Backend:** Experience with Node.js, Express.js and design RESTful APIs.
- **Database:** Familiar with MongoDB, Redis.
- **Software Design Principles:** Good understanding of component-based design, separation of concerns, and scalable state management using Redux Toolkit and Zustand.
- **Scripting:** Basic experience with CLI tools and npm/yarn scripting.
- **Source code version and task control:** Git, GitHub, Trello, Slack.
- **Workflow & Tools:** Experienced with Figma, Photoshop, Docker, and CI/CD pipelines using GitHub Actions.
- **Testing method:** Basic understanding of Unit Testing and debugging in frontend workflows.
- **Language:** Intermediate proficiency in English, capable of reading technical documents and basic communication.

## WORK EXPERIENCE

### Frontend Developer – FoodConnection

Ho Chi Minh City, Vietnam | September 2022 - January 2023

- Built and styled responsive web UI based on design mockups using **HTML**, **SCSS**, and **TailwindCSS**.
- Integrated APIs provided by backend team to ensure dynamic, **real-time** data rendering.
- Focused on **performance optimization** and mobile responsiveness.
- Collaborated with designers, engineers, and product managers to ensure pixel-perfect UI and seamless user experiences.

### Frontend Developer – Jizaka

Ho Chi Minh City, Vietnam | September 2021 - August 2022

- Designed and implemented web interfaces and landing pages.
- Worked with **Photoshop** to convert UI designs into responsive layouts.
- Participated in internal product development and **UI/UX polishing**.
- Practiced version control and task tracking using **Git** and **Trello**.

### Frontend Intern – Mevivu

Ho Chi Minh City, Vietnam | May 2021 - August 2021

- Built and updated landing pages using **HTML** and **CSS** for travel-related campaigns.
- Customized **WordPress** themes to match client branding and marketing goals.
- Gained early experience in responsive design and collaboration with designers on web layout adjustments.

## PERSONAL PROJECTS

### React Trello Clone

Replicates the core functionalities of the Trello app, allowing users to create, edit, and manage task boards with ease. The primary purpose of this project is to build a dynamic, interactive user interface that mimics the experience of using Trello for task management and collaboration. The application features drag-and-drop functionality for tasks, list management, ensuring a seamless user experience.

- Developed a full-stack **task management application** inspired by Trello. Users can create boards, columns, and cards dynamically.
- Implemented **real-time drag-and-drop sync** using **DnD Kit** and **Socket.IO**, ensuring multi-user interaction consistency.
- Applied **Redux Toolkit** for global state management and integrated **JWT-based authentication** using cookie sessions.
- Designed responsive UI using **Material UI** and supported **dark/light theme switching**.
- Built RESTful APIs with **Express.js** and **MongoDB** to handle data persistence.
- Live Demo: <https://hdphuc-trello.vercel.app>
- Github: <https://github.com/hdphuc201/trello-fe> | <https://github.com/hdphuc201/trello-be>

### Ecommerce Website

Replicates the core flow of a modern ecommerce platform, allowing users to browse and search for products, manage shopping carts, apply discounts, and complete secure checkouts. The project is designed to simulate the end-to-end user journey from product discovery to payment, along with an admin dashboard for managing product data and order history.

- Designed to provide a seamless and responsive shopping experience with real-time updates and admin control.
- Admin dashboard allows **full CRUD operations** on products, orders, and discount codes.
- Utilized **Zustand** for lightweight yet scalable state management and **TailwindCSS** for modern responsive UI.
- Built RESTful APIs with **Express.js** and **MongoDB** to handle data persistence.
- Optimized performance with code-splitting, lazy loading, and image handling to achieve **Lighthouse score of 98/100** (FCP 0.6s, LCP 0.9s).
- Live Demo (User): <https://hdpstore.vercel.app>
- Live Demo (Admin): <https://hdpstore-admin.vercel.app>
- Github: <https://github.com/hdphuc201/ecommerce-fe> | <https://github.com/hdphuc201/ecommerce-be>
